

DAY-2

Getting started with Azure

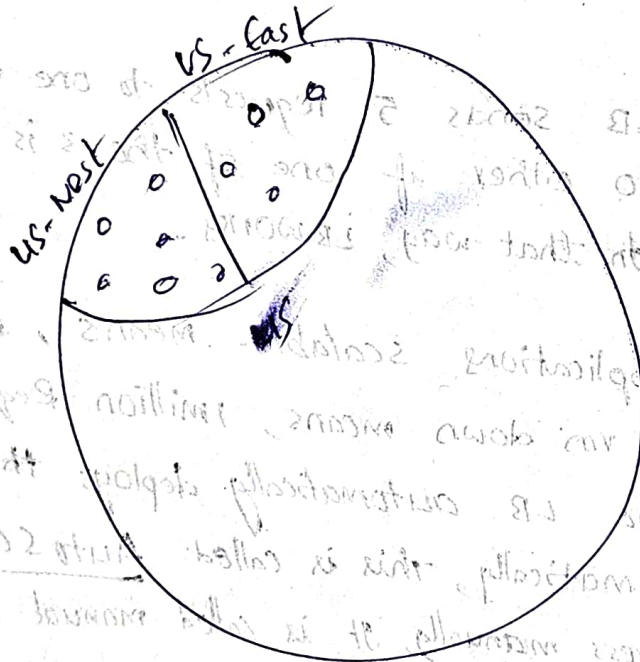

- Topics →
- Creating an account with Azure ✓
 - Exploring Regions & Availability Zones in Azure
 - IaaS; PaaS, SaaS

* To avoid delay in accessing cloud providers like Azure, they have their data centers across the world.

delay = latency

→ If France people accessing apps, they get the response from France Data Center like that.

Each data center is called as Az (Availability Zone)

solves

- 1) Latency
- 2) Downtime

IaaS — Infrastructure as a service — VM, storage, networking
PaaS — platform as a service — DB
SaaS — Software as a service — outlook, email Services
